Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussion was directed towards differences between the claimed invention and the cited references. Particularly, the claimed invention includes the use of an estimated diameter. Applicant felt the estimated diameter and the related functionality is distinguished from the reference. The examiner provisionally agrees that the arguments presented overcome the current rejection as long as they are presented in writing and provide a clear discussion of the issues as discussed in the interview..
